

**BG****BENJAMIN GELB****FULL STACK DEVELOPER | BENJAMIN.GELB.BG@GMAIL.COM****PHONE: 657-438-6526**

## OBJECTIVE

Enthusiastic and motivated developer, eager to leverage my strong problem-solving skills and passion for technology to contribute to innovative software development projects. Seeking a position where I can further develop my coding abilities and collaborate with experienced professionals in a dynamic programming environment.

## COMPETENCIES

JavaScript  
TypeScript  
Python  
Go  
HTML  
CSS  
React  
Node.js  
MongoDB  
MySQL  
PostgreSQL  
Git

## SKILLS

### **TYPESCRIPT, JAVASCRIPT, REACT, NODEJS**

My primary and favorite coding stack is JavaScript/TypeScript in combination with React and Node.js. This is typically tethered to either a document database like Mongo or a relational RDMBS, such as MySQL, PostgreSQL or Microsoft SQL Server.

### **PYTHON, OPENAI, LANGCHAIN**

Built a number of demonstration projects using Python, OpenAI API and the LangChain library. One project included being able to talk to PDF files ChatGPT style. Another project included training a vector database with customer service inquiries and responses. Then the application would auto generate responses based on the training data.

## EXPERIENCE

### **FREELANCE • WEB DEVELOPMENT • JUN 2023 - PRESENT**

Collaborated with diverse clients to create visually appealing and functional websites that aligned with their specific needs and goals. Designed and developed responsive and user-friendly websites using HTML, CSS, and JavaScript, ensuring optimal performance across various devices.

### **ABILISENSE • FULL STACK DEVELOPER • FEB 2023 - JUN 2023**

Built a Chrome Extension to detect anomalies in Audio streams. Used AI audio processing tools and machine learning techniques to analyze audio patterns and identify deviations from normal audio behavior.

## EDUCATION

ITC coding bootcamp • Oct 2022 – Feb 2023

Santa Monica College • 2019-2022
